YR-1 NET PROFIT

~92%

GROSS MARGIN

THE BUSINESS

- ▶ A trading bot that turns Kalshi's **96 daily 15-minute BTC markets** into a hands-off, rules-based engine.
- ▶ **One bot per customer** — their Kalshi key, their Telegram, their own deployment. Funds never leave Kalshi.
- ▶ **Self-serve funnel:** a web form takes payment + keys, alerts the operator, and a dashboard turns each signup into a deploy in minutes.
- ▶ Sizing is a **% of balance**, so one product fits every account size and compounds.

REVENUE MODEL

- ▶ **\$150** one-time setup
- ▶ **\$99 / month** subscription (the core, recurring engine)
- ▶ **20% of monthly profit** — high-water mark; upside, not in base totals*

UNIT ECONOMICS / CUSTOMER / MO

Subscription	\$99.00
Hosting (Railway, 1 bot)	-\$5.00
Stripe fee (~3.9%)	-\$3.90
Gross margin / customer	≈ \$90 (91%)

Fixed overhead ≈ \$130/mo (Claude Max \$100 + tools \$30) — amortizes to ~\$0.26/customer at 500.

12-MONTH PROJECTION

Monthly revenue Active customers (→ 500)

QUARTER	REVENUE	NET PROFIT
Q1 (mo 1–3)	\$10.5K	\$9.5K
Q2 (mo 4–6)	\$31.1K	\$25.1K
Q3 (mo 7–9)	\$76.1K	\$70.3K
Q4 (mo 10–12)	\$153.9K	\$142.2K
Year 1	\$271.5K	\$247.1K

GROWTH & COSTS

- ▶ Ramp: **100 customers by month 6, 500 by month 12** (4% monthly churn).
- ▶ Annual operating cost **~\$21K** — dominated by per-bot hosting, which scales linearly with revenue.
- ▶ Hardware (top-spec Mac mini + curved monitor, ~\$3.3K) **funded from profit** in month 5.
- ▶ Biggest upside lever: the **20% performance fee** — adds ~\$38K/yr in the model even at conservative return assumptions.

*Performance-fee revenue is illustrative and **unproven** — it assumes an average funded balance and monthly return set in the model, and is excluded from the base revenue/net figures above. All numbers are generated by **FlipPulse_Business_Model.xlsx** with fully editable inputs (pricing, growth, costs sourced mid-2026: Railway, Stripe, Claude, GitHub, Apple). This brief is a business projection, not investment advice or a securities offering; charging a percentage of trading profits may require regulatory/compliance review before launch.
