🎯 The 4 things you're collecting — write them here

1 · Kalshi Key ID

2 · Kalshi PEM file

☐ Saved in my Downloads folder (upload the file — don't retype it)

3 · Telegram Token

4 · Telegram Chat ID

1 Kalshi account & API key

- ☐ Create a **Kalshi account** (use the FlipPulse link) and set a password.
- ☐ **Verify your email** (click the link Kalshi sends).
- ☐ Complete **identity verification** if prompted (name, DOB, last 4 SSN).
- ☐ Go to **Settings** → **API Keys** → **Create API Key**; name it **FlipPulse**.
- ☐ **Copy the API Key ID** → write it as #1 above.
- ☐ **Download the PEM file** (⚠ downloads once!) → save it; tick #2 above.

2 Install Telegram

- ☐ Install the **official Telegram** (blue paper-plane, "Telegram FZ-LLC") on phone or computer.
- ☐ Sign in with your **phone number** and the 5-digit code; add your first name.

3 Create your Telegram bot

- ☐ Search **BotFather**; open the one with the **blue** ✓.
- ☐ Tap **Start**, then send **/newbot**.
- ☐ Give a **name** (e.g. FlipPulse Alerts) and a **username ending in "bot"**.

- ☐ **Copy the token** BotFather gives you → write it as #3 above. (Keep it secret!)

4 Start the bot & get your Chat ID

- ☐ Open **your new bot** (the link from BotFather) and tap **START**. (Required!)
- ☐ Search **@userinfobot**, open it, tap **Start**, send **hi**.
- ☐ Copy the **number** after **Id:** → write it as #4 above.

✓ Finish

- ☐ Open the **Customer Onboarding Form**, paste in #1, #3, #4, and **upload the PEM (#2)**.
- ☐ Submit & complete checkout. Done — your bot starts in **paper mode** automatically.

⚠ **PEM downloads once.** If you lose it, just create a new API key and use the new pair.

ℹ **Money stays yours.** The API key can only trade on your Kalshi account — it can't withdraw funds.

FlipPulse · Keep your PEM file and bot token private. Need the pictures? See the full setup guide.
